

This package contains one of the programs from the Learning Technologies Academic Learning Series, a line of educational software programs for children that emphasizes creative problem solving, instead of relying solely on the usual drill and practice techniques.

Educators and software reviewers alike have given high marks to this educational software for its outstanding content, high quality graphics and exceptional technical quality.

Academic learning tools represent only part of the Lifetime Learning Library™ from Learning Technologies, a broad range of products for every age from preschool through adult.

This full line of learning products is teaching new skills to users of all ages. Best of all, not only are these products affordable, they are among the easiest to use and easiest to learn programs on the market.

As technology becomes more affordable and useful to the learning process, we are committed to seeking new ways to make learning exciting and fun for the lifetime of every learner.

Pipeline™

Develops thinking skills such as defining a problem, experimenting with possible solutions, evaluating outcomes, recognizing patterns and determining part-whole relationships.

There are all kinds of problem-solving strategies that flow out of this challenging exercise. Learners from ages eight and up can practice important skills such as problem analysis, information gathering, and experimenting with possible solutions. Best of all, they'll get the connection between learning and fun.

Help! Someone forgot to connect the pipes to get the water flowing in the right direction. Experiment with various combinations of pipe shapes so that everything will get the water it needs. In the process, you'll get plenty of practice in problem solving. Want to increase the challenge? Set a time limit and connect all the pipes before the water flows. There are three levels of difficulty, so go ahead and take the plunge!
